*"This current conjunction, in context to the current stage of the human condition, indicates that the next 14 years could indeed prove extra challenging for us all. Increasing our awareness at this critical juncture is important. However, the higher level of awareness is not about politics but psychology and specifically that of spiritual psychology, which can also be understood as spiritual science or the science of the soul. # Tip of the Week:

The Sun in the Sign of Aries has had its turn and now it is **Taurus time**, starting today - April 19. What is extra special about it this year is that right on the heels of the first day of the **Sun** in the Taurus cycle, **Jupiter and Uranus** will form a **conjunction, also in the sign of Taurus**, less than a day later.

These two gas giants only form a conjunction every 14 years. The last time they formed a conjunction was June 8, 2010 at 0 Aries, the literal alpha degree of the Zodiac which was the beginning of a grand cycle of about 170 years. In this regard, this 2024 conjunction is 'phase 2' and continues until September 8, 2037 when Jupiter and Uranus will meet once again in the sign of Cancer.

Looking back, that Jupiter/Uranus conjunction in June 2010 at 0 degrees Aries was a triple conjunction, followed by two conjunctions in Pisces. The first of the two in Pisces was on September 19 and the second was on January 4, 2011. This triple punch, so to speak would have been very potent for people with planets and angles at the late degrees of Pisces and the very early degrees of Aries.

Now, this cycle which kicks off April 20/21, 2024 with the **conjunction in Taurus**, can generally be described as a 'worldwide renovation project' associated with the distribution of wealth, which requires removing old foundations and replacing them with new ones. Time will tell how this will play out on the world stage, for better or worse.

**PS** - my Masterclass series continues, with **The Laws of Energy and the Psychology of Balance** happening tomorrow - April 20! It will include Q&A, and will be recorded if you can't make it live.

# Weekly Horoscope:

## **Aries (Mar 21 – Apr 19)**

The desire is there, and perhaps even your energy levels too, but is the spirit willing? This is a question of attitude and motivation, on one hand, but of destiny at deeper levels yet. You have every right to challenge such 'esoteric notions'. The truth will come out in the end. Doing inner work by clearing doubt or apathy could prove to be worth the effort.

## **Taurus (Apr 20 – May 20)**

Fresh waves of power and rebellious determination to change the status quo somehow, or at least your own, are indicated. You could be feeling the call to commit to a great vision or higher cause. This impulse has been brewing for a few months anyway. The next big push will begin in early May. In the meantime, you will be busy preparing.

## **Gemini (May 21 – Jun 21)**

A whole new sense of who you are as an individual is on the rise. Inner reserves will be released along with talents. The focus includes self-care. There is a theme of change and transformation implied, especially regarding your daily routine and rhythms and perhaps your lifestyle in general. A learning curve is implied and includes unlearning as well.

## **Cancer (Jun 22 – Jul 22)**

Shifts, changes, and new beginnings in general in your world were triggered by the recent eclipse. These are now in their developmental stages. You are being called to be both empathetic and assertive. Yielding to the larger flow and opening your mind to receive what wisdom and lessons are included will smooth the edges.

## **Leo (Jul 23 – Aug 23)**

While the eclipse has likely inspired new visions, you are also contending with the slow but sure process of transformation. It is pushing you to get to the bottom of things, according to the circumstances and flow of your reality. This could include deep repairs and renovations, on one and, or confronting core fears on the other, and more...

## **Virgo (Aug 24 – Sep 22)**

A subtle but sure process of personal change and transformation is underway. It could well be associated with your focus on health and fitness. You are ready to replace old

habits with new ones. Meanwhile, an ardent commitment to the future is countered by a steady disintegration of past interests, orientations, and relationships.

### **Libra (Sep 23 – Oct 22)**

Fresh starts and beginnings on relationship fronts could be the source of new excitement. These may require more effort than anticipated, however. A learning curve and possibly even an emphasis on training is indicated. Financial factors play a role in your overall assessment of the value and importance of your engagement.

### **Scorpio (Oct 23 – Nov 21)**

Jupiter conjunct Uranus occurs in your relationship sector. Expect big changes, many of which should be evident in terms of themes that have been gestating for some time. This could be just the breakthrough you have been dreaming about. On the other hand, if you have been resisting or in denial, these changes could seem big and sudden.

### **Sagittarius (Nov 22 – Dec 21)**

Although the recent eclipse was destined to awaken you to inspired new visions, some major drama has likely been unfolding these past several weeks. Themes of renovation, or medical procedures like operations or soul searching are part of the plot. These have likely shaken you, perhaps even at core levels. Cooperation is the key.

### **Capricorn (Dec 22 – Jan 19)**

Questions about who you are really, authentically, at a core level, and what you feel you genuinely need let alone simply want have been activated. While such processes can be supported by intellectual knowledge, superficiality will not suffice. In fact, this entire process is just getting underway, and it will continue in stages for some years!

### **Aquarius (Jan 20 – Feb 19)**

New perspectives and considerations about your place in the world or how you interpret it and yourself in it have all been stirred or even agitated by this eclipse. These destined themes have been waiting for this moment. Like garden bed soil in early spring, your task includes turning, weeding, and preparing to plant seeds. What do you want to grow?

### **Pisces (Feb 20 – Mar 20)**

While the eclipse activated new ambitions, Mars, Saturn, and Neptune in your sign have probably contributed to feeling content to cruise in the slow lane, for now. The positions of all the planets each in their respective cycles contribute to the plot, producing unique themes and personal timing. Attend to unfinished business and prepare for the big push, coming soon...
