Tip of the Week:

Under a **Taurus Sun**, and a **Moon** waxing to **Full** (at 22 **Scorpio** 13) on **Monday, May 12**... Mercury, Venus, Chiron, and Neptune are **all in fiery Aries**.

And with **Mars in Leo**, well, you might appreciate why the heat is on that much more noticeably at both individual and collective levels.

We are also under the intense and transformational power of **Pluto retrograde** as of May 5, which will continue through to mid-October. Having advanced to 3 Aquarius 49, Pluto will now retreat back to 1 Aquarius 22. If Pluto makes hard aspects to planets in your Natal Chart, and if it or they happen to be in the scope of these degrees, you will undergo the destined, progressive, and sure process of transformation.

The key is to be aware of what it implies and to cooperate with it as much as you can.

All the above, in context to the sunrise process of the Age of Aquarius, requires additional awareness and guidance to navigate your way.

Have a great week,

Michael

Weekly Horoscope:

Aries (Mar 21 – Apr 20)

The strong Aries factor is igniting your resolve to take new leads and strides. The strong Taurus factor is guiding a more practical and realistic orientation. It includes investments of one kind or another, which will be further emphasized with Mercury there as of this weekend. An altogether busy time that will accelerate yet.

Taurus (Apr 20 – May 21)

Covering a lot of ground on a variety of fronts continues. While the Sun in your sign indicates new assertions, the strong fire element factor is pushing you inward, or at least behind the scenes. So, it is a good time to be focused and industrious, doing those things that you would prefer not to when the weather invites more outside time.

Gemini (May 21 – Jun 21)

Exploring a new sense of your individuality continues, yet with even greater force. Yet, you are also inclined to some measure of inward retreat. This will increase yet. Positively, your energy levels are running strong, and you are in an expansive mood as well. With your sights set on the future, you feel determined to advance your position with ardent determination.

Cancer (Jun 21 – Jul 22)

Things are shaking on both public and professional fronts. You are feeling the call to assert yourself with a renewed sense of ambition. Yet, part of the pull is to commitments to the call of your soul. This is where things are not so straightforward. Consequently, you may find yourself between two worlds, including the ambitious drive without and the spiritual summons within.

Leo (Jul 22 – Aug 23)

The Sun in Taurus in your career sector, and Mars in Leo, activating a determined drive to enter new territory somehow, are a source of both excitement and discernment. Both from without and within, you feel the need to make some changes. You wonder what you should and what you can genuinely afford to let go of, or should you focus on a transformational process that will renew your resolve?

Virgo (Aug 23 – Sep 22)

Taurus time is generally one of practical orientations, on one hand, and philosophical aspirations for you. With the influence of Leo, you might be feeling pushed to do some inner work to overcome doubts, worries, and confusions. Professionally, you are also dealing with the contrasting influences of contraction and expansion. Altogether, an accurate reflection of these complex times.

Libra (Sep 22 – Oct 22)

Circumstances are guiding you to take a deep dive of some kind. It could be as simple

as doing so in your garden, or it could be more centered on finances, taxes, and other fiscal interests and responsibilities. With a good deal of activity occurring on relationship fronts, meanwhile, it is likely that your plate is probably quite full.

Scorpio (Oct 22 – Nov 21)

Your relationship life has also taken center stage. Yet, the emphasis is on lifestyle and your overall health. These factors are leading you to take things slowly. Meanwhile, on professional fronts, as determined as you are to make an ardent push, you might also yearn for new knowledge and training to enter a new career altogether.

Sagittarius (Nov 21 – Dec 21)

With Aries and Leo both so strongly activated, completing a Grand Fire Trine with your Sun, you are likely feeling excited, energized, mobilized, feisty, and perhaps frisky too. You have likely experienced a progressive expansion on social fronts over the past year, leaving you feeling more confident and effectively on a roll. Expect this trend to continue.

Capricorn (Dec 21 – Jan 19)

Taurus time is one of play for you. Yet, it could just as easily culminate into passion and drama, for better or worse. The strong influences of Aries and Leo are both edgy and awkward in some regards. These energies can be harnessed for practical application and satisfactory outcomes, but extra awareness and effort are likely required.

Aquarius (Jan 19 – Feb 19)

Taurus can be described as your anchor sign, the one that you feel in your core. It is the sign of values and priorities, which for you include the prospect of realizing dreams, on one hand, but also tend to include humanistic and spiritual interests and orientations. The Mars factor currently could be the source of heated moments, yet could also prove quite energizing.

Pisces (Feb 19 – Mar 20)

The Sun in Taurus tends to be busy for you, including new projects. Positively, you have been and continue to be in the mood to make the extra efforts required. This influence will continue, so make the most of it to do the work required, so you can feel more at peace and be in a better position to take advantage of downtime. However, this work trend is destined to continue for a few months.
